# AuditConfirm

## Digitised Circularisations performed quickly, easily and securely.
### ISA/ASA 505 Compliant

AuditConfirm was created to automate and improve audit efficiency by digitising your customer/supplier circularisations and audit confirmations.

Our Microsoft Azure cloud solution is designed to professionally increase participation, track progress and generate audit confirmation reports in a verifiable and secure manner.

**Easily generate digital Internal & External Confirmations to validate Board, Management and Audit financial information relating to AR & AP**

1. Multi-Customer/Supplier
2. Multi-Language
3. Multi-Territory
4. Multi-Currency
5. Customisable Period/s

### Digitised Workflows

Say goodbye to manual circularisation and audit confirmations. The digital workflow process will save time and resources by allowing you to manage the end-to-end circulisation process accurately.

### Automated Email Confirmation Letters

Bulk email distribution, via your own email domain, to your customers/suppliers to obtain digital confirmations with auto-reminders to ensure maximum participation.

### Track and Report Live

Track participation and progress in real-time and report to key stakeholders via dynamic dashboards.

Real-time comparison of your AR & AP balances with Customer/Supplier balances.

Live reporting of negative confirmations.

### Relationship Agent Workflow Tool

Maximise your Customer and Supplier participation by giving your staff an easy-to-use workflow tool. This equips them to easily record contact and feedback from Customers and Suppliers.

The live Dashboard provides real-time feedback to Managers and Auditors.
